

MEME TRADING UNIVERSITY · THE FIELD EXAM

THE FIVE STAR CHALLENGE

Anyone can win one trade on one lucky day. The Five Star Challenge proves the only thing that matters: that you can do it **small, and do it again**. Five rules, all built on the number five. Pass it and you've earned your place in The Watch.

THE STANDARD

FIVE RULES. ALL FIVES.

This is a **discipline test, not a bankroll test**. The position cap is tiny on purpose — nobody blows up learning, and nobody can buy their way through. What's left is skill and consistency.

5

DAYS

Sustain it five trading days — consistency, not one lucky session.

5

TRADES / DAY

Five different token trades each day. Show up and work the tape.

5

GREEN DAYS

Every one of your five days closes in profit. A single red day resets the run.

\$5

MAX POSITION

Never more than \$5 into a single token. Skill, not capital.

\$5

MIN / DAY

Clear at least \$5 profit each day. Small size, real result.

FIVE DAYS · FIVE TRADES A DAY · FIVE GREEN DAYS · **\$5 MAX · \$5 A DAY**

WHY IT'S BUILT THIS WAY

\$5 CAPS BLOW-UPS

A five-dollar position can't wreck you. You get to learn the tape with real money on the line and near-zero risk of ruin — the exact opposite of how most people learn.

FIVE GREEN DAYS IS SKILL

Anyone can win a trade. Closing five straight days in profit — no red day allowed — is a pattern luck can't fake. It forces you to cut losers and protect the day, not gamble on one pump.

FIVE DAYS IS PROOF

One good day is a story. Five is a pattern. The Watch only enlists traders who've shown the pattern, because the whole brand is credibility first.

IT CAN'T BE BOUGHT

With a \$5 cap, a whale and a broke recruit run the exact same challenge. Money doesn't pass it. Reading the enemy's playbook does.

HOW TO RUN IT

1 TRAIN FIRST

Finish **Basic Training** and **Tool Training** before you start. The challenge assumes you already know the Cabal's playbook and how to read a Watch Score. [See the full path ►](#)

2 USE ONE DEDICATED WALLET

Run the entire challenge on a **single wallet** so the record is clean and readable on-chain. Fund it small — you never need more than a few dollars at a time.

3 HIT THE FIVES, FIVE DAYS

Each day: five different trades, the day closes **green with at least \$5 profit**, and nothing goes over \$5 into a single token. A red trade is fine as long as the day ends in the black — but a red day resets the run. Keep the wallet clean, no outside transfers mid-challenge that muddy the PnL.

4 SUBMIT YOUR WALLET

When you've cleared five straight days, **submit the wallet address**. The Watch reads its trade history straight off the chain and verifies every rule — the same on-chain forensics we run on the Cabal. No screenshots to fake; the ledger is the proof.

5

GET ENLISTED

Pass, and you're **Watch-Certified**. You get the full back-end arsenal and early access to Fair Launch tokens.

SUBMIT / ASK ON DISCORD ▶

BACK TO ENLISTMENT

Submission is manual for now — post your challenge wallet in the Discord and the crew verifies it on-chain. Automated verification (paste a wallet, The Watch grades all five rules for you) is being built.

The Five Star Challenge is a **training exercise**, not financial advice and not a promise of profit — most people who trade memecoins lose money, and the \$5 position cap exists precisely because the risk is real. Trade only what you can afford to lose. The Watch teaches you to read observable on-chain behavior; every decision is your own. [Back to base ▶](#)
